

The four marinas of municipality of Glifada in Athens (www.glyfada.gr) preferred the Successful Marin

Vice mayor of Glifada (www.glyfada.gr), Mr. Champakis G., signed a contract with Successful Software to setup the Successful Marina Management System in the four marinas owned by the municipality. The project will be challenging because of the volume of the mooring places (the four marinas have a combined volume of about 1.000 mooring places in total). The delivery date is being estimated to be around summer of 2004. With this project the Successful Marina will manage a total of 1.500 mooring places in Greece.
